2. [Collection image](#)
3. [Collection availability](#)
4. [Products](#)
5. [Search engine listing preview](#)
6. [Saving the new collection](#)

Once you have added products to your store, you can categorize the same products under one folder and present them as a collection in your store. For example, if you have watches of different models for men and women, as well as a variety of shoes, rather than scattering all the products on one page, you can display these products under a separate collection of watches, and shoes respectively.

☐ You cannot create a collection unless you have added at least one product to your store already. Because, once you create a collection, you have to add a product to it. And without a product, having a collection makes no sense.

Creating a collection in Cartzy is very easy. Just go to the path mentioned below and fill in the required information on the **Create Collection** page.

Path: Products > Collections > Click on the Create Collection button.

On the **Create Collection** page, you will see the following sections where you need to input information about your new collection.

- Collection Details
- Products
- Collection Availability
- Collection Image
- Search Engine Listing Preview

Collection details

Enter the **title** and the **description** of your new collection. Whatever text you enter here will appear on the front-end site of your store where the collection is listed.

Introducing Our Watches Collection: Where Elegance Meets Precision

Discover timeless elegance and impeccable craftsmanship with our Watches Collection. From classic to contemporary, each timepiece is a masterpiece of design and functionality. Choose the perfect companion for every occasion and make a statement that transcends time. Elevate your style with us today.

Collection image

Click on the **Add Image** button to upload an image file for your collection. Once the image is uploaded, the following will occur:

- Its preview will start appearing in the image placeholder as demonstrated in the screenshot below.
- A **text box** will appear to add the image alternative text. Here, you can add the **Image Alt Text** for the screen reading tools as well as for SEO purposes.

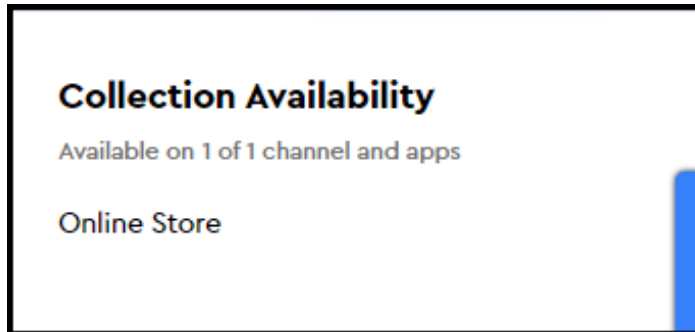

Collection availability

This section gives information about the availability of your product collection i.e., on which

channels, stores, or apps, your product collection is available.

Since you are setting it up on your online Cartzy store, the collection availability will be “**Online Store**” by default for your new product collection.

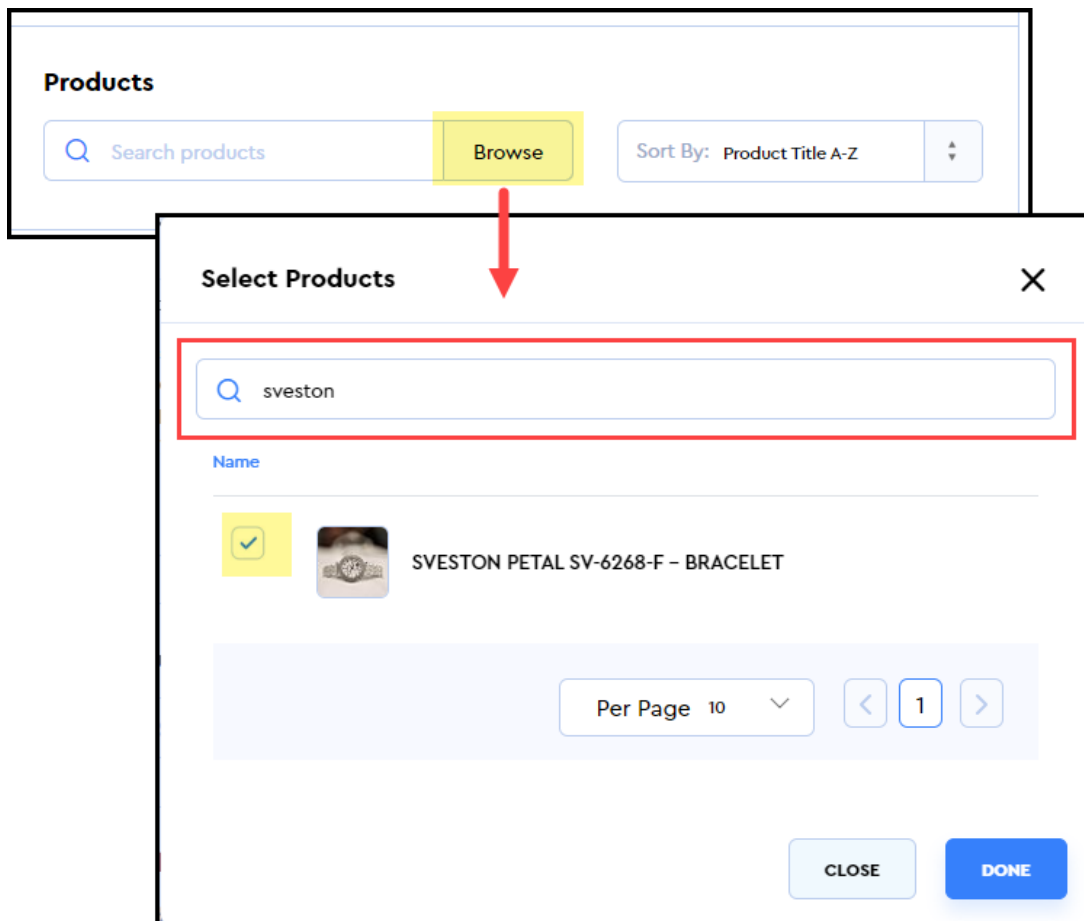

Products

This is the section where you add the products to your store. Please note that you can link only those products that are already added to your Cartzy store. To add a product:

1. Either enter the **name of the product** in the **search bar** to search for your product or click on the **Browse** option to choose the product from the list of available products.
2. On the **Select Products** popup window, select the desired product(s), and click **Done**.

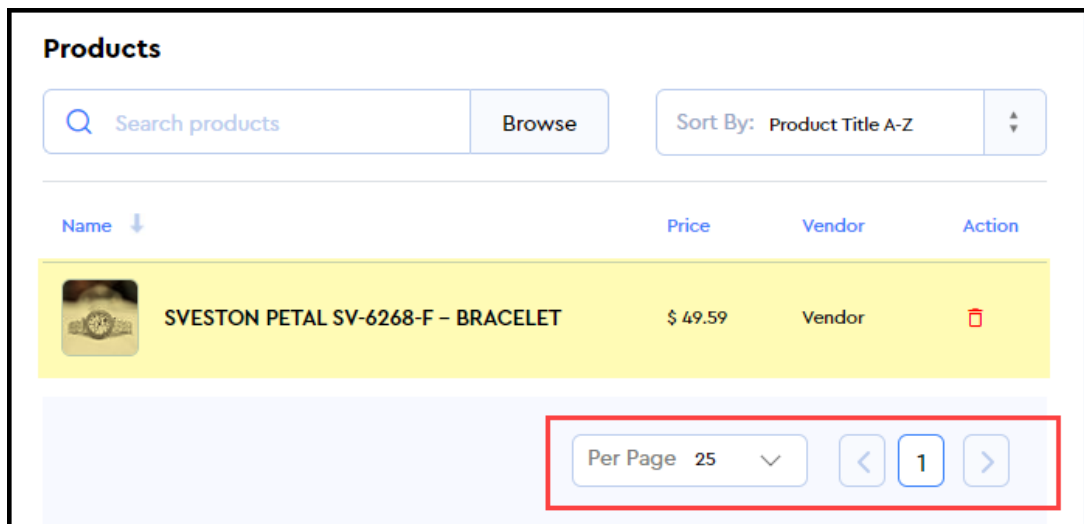

□ If the list of products is too long, you can customize the list view by changing the number of products that you want to view at one time to choose from. Use the **Per Page** dropdown selection option to customize the products list view.

□ If there are no products in your store, then you must create a new product before creating a new product collection.

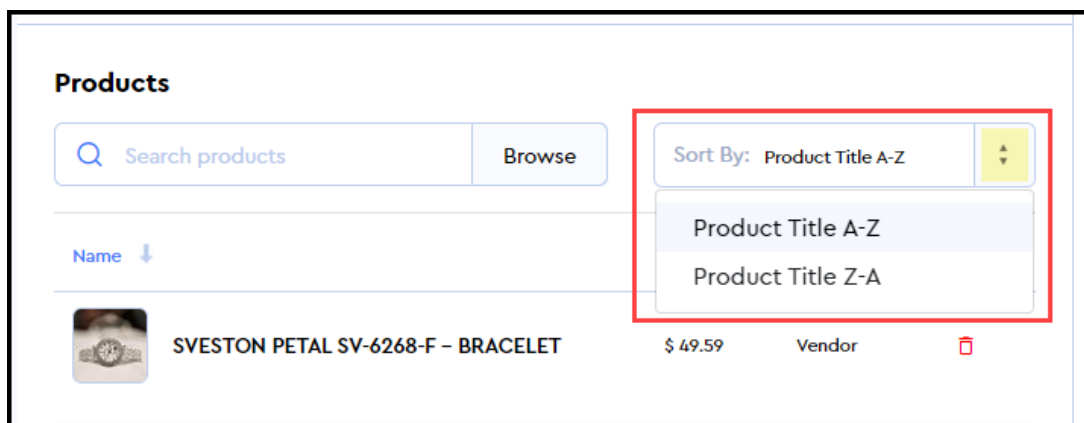

3. Once you click **Done**, the selected product will start appearing under the **Products** section. It indicates that the product has been added to the new collection that you are creating.

4. If you have added multiple products, and it appears as a long list of products under the **Products** section, you can always customize the list view to display a certain number of products per page by using the **Per Page dropdown selection option**.

5. You can also sort the added products chronologically or in reverse order by using the **Sort By** option given next to the **Browse** option.

Search engine listing preview

This section allows you to control two things:

- The display of your product collection when it appears in search results. You can customize the search engine listing view of your product i.e., it enables you to customize the title, description as well as the page URL.
- SEO ranking of your product collection page.

By default, the **Page Title** becomes the slug of the **collection** page URL.

☐ Enter optimized content because this section helps in better SEO ranking of your collection.

☐ Whatever **title** and **description** content you enter here will not alter anything that was added earlier under the **Collection Details** section.

Saving the new collection

Once you have added all the details of your product, click the **Save Changes** button at the top right corner of the page. The following will occur:

- The new product collection will be added to your store.
- A success **notification** will appear in a popup.
- You will be navigated back to the **Collections** page where your new product collection will be listed at the top. From here, you can further [manage your collection](#) as per business requirements.

The image consists of three vertically stacked screenshots illustrating the workflow for saving a new collection. Red arrows indicate the sequence of steps.

First Screenshot: 'Create Collection' page
The page title is 'Create Collection' with a back arrow. Below the title is a 'Collection Details' section. At the bottom right, there are two buttons: 'DISCARD' and 'SAVE CHANGES'. The 'SAVE CHANGES' button is highlighted with a red rectangle.

Second Screenshot: 'Create Collection' page with success notification
The page is the same as the first, but a success notification popup is visible in the top right corner. The notification contains a green checkmark icon and the text 'Collection has been created successfully.' The notification box is highlighted with a red rectangle. A red arrow points from the 'SAVE CHANGES' button in the first screenshot to this notification.

Third Screenshot: 'Collections' page
The page title is 'Collections' with a back arrow. At the top right is a 'CREATE COLLECTION' button. Below the title is a search bar labeled 'Search collections'. A table lists the collections with columns: 'Title', 'Product Condition', and 'Actions'. The first row in the table is highlighted with a red rectangle and contains a watch icon, the title 'Watches', and a dash in the 'Product Condition' column.
